

Improve Your Cellular Signal Now

Effective Strategies for Far-Reaching Coverage

with AAA Communications

AAA Communications delivers tailored, high-quality mobile coverage solutions for Australian businesses. We ensure reliable indoor reception and enterprise-grade signal distribution using the latest industry-leading tech.

Working closely with clients, we handle site surveys, design solutions, install systems, and provide ongoing maintenance—meeting your specific needs with proven expertise.

We offer a range of solutions to suit any environment:

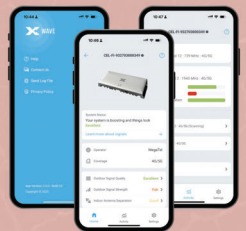

- Cel-Fi GO Boosters: Improve signals in targeted areas.
- QUATRA Active DAS Hybrid: Site-wide, enterprise-grade amplification.
- Distributed Antenna Systems (DAS): Scalable in-building coverage for venues of any size.

Practical, Solution-Focused

- From signal blackspots to full bars, ensuring reliable connectivity.
- Long-term fixes that resolve signal issues and deliver clear ROI.
- The coverage experts — indoors and out.

Use-cases Mobile Signal Repeaters

- Healthcare: Ensures critical communication and service continuity.
- Retail & Commercial: Boosts coverage for staff and customers.
- Rural, Construction, Mining: Extends connectivity across large areas.

All devices are ACMA-approved for safety and compliance. These solutions deliver immediate connectivity and long-term ROI.

QUARTRA Smart Signal Management

Powerful Signal. Smarter Connectivity with installation You Can Trust

Compatible with all major operators—Telstra, Optus, and Vodafone—and supporting both 4G and select 5G technologies out of the box, the system offers a straightforward yet powerful coverage solution. Its modular design allows for easy scalability by adding extra Coverage Units (CUs), enabling support for areas up to approximately 12,000 sqm.

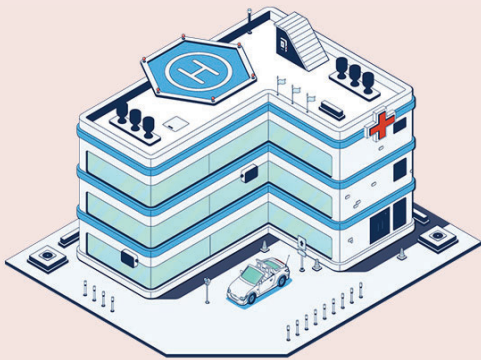

Distributed Antenna Systems (DAS)

Scalable In-Building Coverage for Large Sites

- End-to-end DAS design, installation, and testing
- Seamless multi-carrier mobile signal distribution
- Suitable for offices, hospitals, airports, and multi-level buildings
- Compliant with emergency communication standards

Customised to your building size and signal needs

Why AAA Communications?

- Skilled, trained installers
- Desktop and on-site surveys for customised solutions
- Reports with before-and-after photos of improvements
- Nationwide support
- Solutions tailored to your environment
- Decades of wireless expertise
